**"Executive Functioning"**

***Aka...***

**The over-stimulated brain of a Teenager**

with guest speaker

**Dr. Georgia Bozeday, Ed.D.**

**Date: Wednesday, November 3, 2010**

**Time: 7:00 - 8:30 pm**

**Place: Riverside Brookfield High School-Alumni Lounge**

All students in the freshman class at Riverside Brookfield are participating in the Rush Neurobehavioral Center Executive Function school-based program to help students develop better organization skills and time management strategies.

Dr. Bozeday will present an overview of current research from neuroscience describing the impact of the 21<sup>st</sup> Century influences on students today. She will focus on recent findings related to media use and learning. Dr. Bozeday will provide recommendations for parents as they work with children at home on these concerns.

Additionally, this presentation will provide parents with practical strategies from the field of Executive Functions to help them guide students at home. Discussion will primarily include strategies for organization and time-management.
